

## Technical Note: Using the Blue Book's functionality with mobile phones & tablets

The CBYRA Blue Book contains many links that navigate to NORs, Course Charts and other documents of interest. These links work flawlessly from the Adobe Acrobat Reader application on your computer. However, Apple iPhones and iPads use a native PDF 'preview' app that does not recognize the links. Many Android-based mobile phones and tablets also have their own native 'preview' function for viewing PDF files which also does not recognize the links.

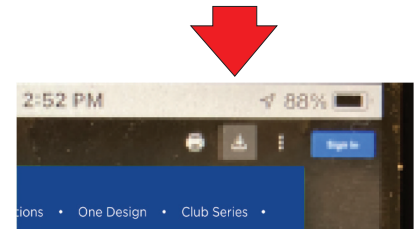

Therefore, if you want full functionality when viewing the Blue Book on these devices, you need to download the **Adobe Acrobat Reader** App to these devices, and use this App to view the Blue Book. Here's how to do that:

1. Go to the Apple App Store (iPhone & iPad) or the Google Play App Store (Android-based phones & tablets), and search for "Adobe Acrobat Reader". Install this app on your device. **Its Free!**

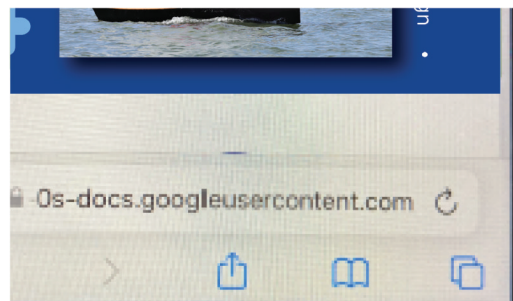

2. Go to the CBYRA Web site, and using the Menu pull-down, go to Racing, then Blue Book.

3. Click on the Blue Book image (or click the button link) to open the Blue Book.

4. Click on the "Download" symbol in the top right corner of your screen. This will save the Blue Book document on your device.

5. The downloaded document will now appear, but you may still be viewing it with the device's native 'Preview'. Click on the symbol shown at the bottom of your screen.

5. You will then have the opportunity to select Adobe Acrobat app on your device for viewing the document. When viewing the document using the Adobe Acrobat reader installed on your device, all links contained in the Blue Book will be accessible. Just click on them, and the selected item will open.
